

Canusa TubularStops - PLX

High shrink end cap for pre-insulated pipes

Canusa-CPS is a leading manufacturer of specialty pipeline coatings which, for over 30 years, have been used for sealing and corrosion protection of pipeline joints and other substrates. Canusa high performance products are manufactured to the highest quality standards and are available in a number of configurations to accommodate your specific project applications.

Product Description

The Canusa Tubularstop - PLX-65 is a heat-shrinkable, end cap for pre-insulated pipes (example: district heating pipes). The PLX-65 is made from a specially formulated crosslinked polymer and when combined with a high temperature sealant (ECS), it provides a high quality, reliable system for the sealing protection of pre-insulated pipes.

Features & Benefits

Watertight Seal

The Canusa Tubularstop - PLX-65 is designed to provide a watertight seal and prevent water access to the exposed insulation at the weld joint area. Upon application of heat, the PLX-65 shrinks to conform to the profile of the insulated pipe, while the sealant simultaneously "melts" to bond to the jacket pipe and the service pipe. To ensure overall protection of the insulating foam, PLX-65 should be used on both pipe ends.

Insulation Protection

The Canusa Tubularstop - PLX-65 can be factory-installed on the pre-insulated pipe. Once installed, the PLX-65 protects the insulation during transportation and storage. During service, the PLX-65 prevents water ingress into the insulation in the event of leakage at the joint. This can greatly reduce repair costs.

Large Size Range

The Canusa Tubularstop - PLX-65 is available in a full range of sizes to fit most service/jacket pipe combinations. Since the PLX-65 is heat shrinkable, one size can be used to cover several jacket pipe/service pipe combinations.

Easy Installation

The Canusa Tubularstop - PLX-65 is quick and easy to install. Upon application of heat the product quickly conforms to cover the pipe ends. The PLX-65 comes with a separate roll of adhesive which reduces the installation time.

Applications

Pre-Insulated Pipes

Oil & Gas

Water Pipelines

End Seal

High Temp

Double wraps of ECS can also be used to increase the sealant width (it will double the max sealant length required and half the pieces/adhesive bulk roll)

Typical Product Properties: PLX-65 and ECS

Test Standard	Unit	Typical Result	Test Standard	Unit	Typical Result		
Backing Tensile Strength	ASTM D638	MPa (psi)	24 (3480)	Temperature Range	ASTM D1002-53T	°C (°F)	-23 to 120 (10 to 250)
Backing Elongation	ASTM D638	%	700	Lap Shear Strength	ASTM D395.55	N/cm ² (psi)	12 (17)
Backing Hardness	ASTM D2240	Shore D	48	Compression Force		kg, (lbs)	6.8 (15)
Dielectric Voltage Breakdown	ASTM D149	kV/mm	27	(1" x 1½" x 4")			
Water Absorption	ASTM D570	%	0.05	Elongation	ASTM D638	%	400
				Hardness	penetrometer	--	58
				(100g, 5s)			
				Low Temperature Flexibility	ASTM D2671	°C (°F)	-15 (5)
				Moisture Vapour Resistance	ASTM E96	perms/10 mils	0.747

How to Order: PLX-65 and ECS

PLX-65 260/100-250 BK	Ordering Options	ECS-B 30-1.25-15 BK	Ordering Options
Colour	PLX-65	Colour	ECS
Sleeve Width	BK - Black	Roll Length	BK - Black
Supplied/Recovered	250, 300, 450mm (10, 12, 18")	Adhesive Thickness (as supplied)	15m (50ft)
Recovery	260mm/100mm	Roll Width (as supplied)	1.25mm (0.050")
Shrink Ratio	65%	Bulk Roll Designation	30mm (1.25")
Backing Thickness (as supplied)	X = High Shrink	Configuration	B = Bulk Roll Quantity
Configuration	L = 0.85mm (0.033")		ECS = End Cap Sealant
	P = CanusaTube™
